

Procedures for Querying the DAASC

DAASC is basically a router for all the depot requisition status, follow-up, etc. DAASC receives and passes images to the appropriate Routing Identifier Code (RIC) in the requisition, i.e. S9M to DSCP, F04 to AFMLO and to General Services Administration (GSA). DAASC developed procedures to allow customers to remotely query their MILitary Standard BILLing System (MILSBILLS) and MOV database.

Your terminal must be configured with the following specifications: VT100 Emulation; 8 Data Bits; 1 Stop Bits; No Parity; Full Duplex and up to 14.4 KBPS Speed. Check with your computer/information personnel with questions or problems on your systems configuration.

The four ways to access the database at DAASC for MOV or MILSBILLS inquiries are:

1. Stand-alone terminal equipped with an Asynchronous MODEM
2. Local Area Network (LAN) terminal with dial-up capabilities
3. Defense Data Network (DDN) connection
4. Internet

To use the Stand-alone/LAN terminal access:

1. Dial commercial number (513) 296-5506
2. At the prompt **USERNAME:** type in **milsinq**
3. At the prompt **PASSWORD:** type in **bills**
4. Select option **1 (Query)** from the menu:
 - a. Enter the appropriate MILSBILLS or MOV query(s), i.e. M_FM**** for the entire account or M_FM****73051000 for a particular document number
 - b. To use the "HELP" selection, exit to logoff when your query is completed
5. To view the requisitions, type: d and the line number you wish to see, e.g. D_01. Make sure you put a space between the D and the number and a two-position number.

To use DDN Access:

1. Perform DDN connect to MILNET
2. TELNET to 198.97.75.15 or 192.67.251.15 or 192.67.251.16 or 192.67.251.18
3. At the prompt **USERNAME:** type in **milsinq**
4. At the prompt **PASSWORD:** type in **bills**
5. Select option **1 (Query)** from menu:
 - a. Enter the appropriate MILSBILLS or MOV query(s), i.e. M_FM**** for the entire account or M_FM****73051000 for a particular document number
 - b. To use the "HELP" selection, exit to logoff when your query is completed
6. To view the requisitions type: d and the line number you wish to see, e.g. D_01. Make sure you put a space between the D and the number and a two-position number.

To use the Internet you should:

1. Type <http://www.daas.dla.mil/>
2. At the bottom of the page click on /MILSINQ/
3. Click on **CONNECT**
4. At the prompt **USERNAME: type in milsinq**
5. At the prompt **PASSWORD: type in bills**
6. Select option **1 (Query)** from menu:
 - a. Enter the appropriate MILSBILLS or MOV query(s), i.e. M_FM**** for the entire account or M_FM****73051000 for a particular document number
 - b. To use the "HELP" selection, exit to logoff when your query is completed
7. To view the requisitions type: d and the line number you wish to see, e.g. D_01. Make sure you put a space between the D and the number and a two-position number.

NOTE: Users will automatically be logged off system after five (5) minutes of idle time!

In summary, this can be a very advantageous tool to research/identify problems. You can use your Incoming AUTODIN Transaction List part I to see if an APX (report garbled, MOV) was sent back to DAAS or an AN1/AN9 on part II for receipt of the MOV. If you have any questions/problems after you have checked with your computer/information personnel, call DAASC information help desk (513) 296-5914 or DSN 986-5914. (FOC-A, SSgt Glenn Blackshear, DSN 343-4050).
