Introduction

This catalog is effective April 1, 2004, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www.HermanMiller.com.

All products are to be ordered by complete product number. Where additional information, such as finish, color, caster option or location suffix, is to be specified, instructions are noted.

All prices are list prices. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions are approximate. Product is shipped set up or knocked down.

Service problems are normally handled by a Herman Miller for Healthcare authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

Storage and Transport Solutions

Storage and Transport Solutions.

Controlling costs. Enhancing performance. Healthcare today strives to meet two seemingly incompatible objectives. Intelligent storage and transport solutions from Herman Miller can help you do both. It's no wonder – we are the world leader in clinical storage and transport products.

Improved productivity.

Our broad product offering works together as a total system to improve storage and transport capabilities, within facilities or between campuses. Interchangeable drawers and accessories allow staff to reduce the number of times they handle supplies because once a drawer is packed it remains so – from storage to transport to point of use. Reducing time spent on handling materials frees staff to focus on caregiving.

Better value.

Herman Miller products are the result of over 30 years of experience serving the healthcare industry. That experience backed by our extensive customer research has demonstrated the value of offering a system of modular products that stands up to rigorous daily use. Our multi-year warranties are the best in the market and clear evidence of the confidence we place in our products' durability. Take our Procedure and Supply carts, for example. Their shock-absorbent, high-grade plastics eliminate dents and rust and remain good looking even after years of use and cleaning.

Typical Configurations

Typical Product Configurations

In healthcare, some work processes are standard, and the product configurations that best support them are typical. Herman Miller has gathered some of these common configurations in this section.

They provide examples you can use when preparing plans and budgets. Or, if an example meets your needs, it can supply a shortcut for designing your configuration because each typical shown includes a complete product list.

These examples are not sold as complete units. But you can use them as a guide for designing your storage and transport solutions to make the selection process easy and convenient.

For component options beyond those shown here, see the Custom Configurations section of this catalog.

Procedure/Supply Carts

Single-Wide

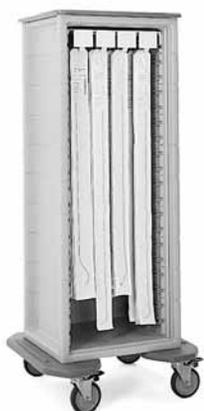

Anesthesia Cart

Cast Cart

The interchangeable components of our single-wide procedure/supply carts allow them to be configured to meet specific needs and quickly changed to handle new requirements. This allows tasks to be completed faster and easier. The models shown here represent the most popular configurations. All carts feature impact-resistant plastic that can withstand intensive, three-shift use and are protected by an industry-leading 10-year warranty.

Trauma/Chest Cart

Double-wide procedure/supply carts are particularly useful in applications that require capacity and durability in the bulk storage and transport of supplies. The fact that their drawers interchange with our other storage and transport products means labor savings can result from packing drawers once and eliminating

subsequent handling until point of use. Carts without spines offer wide-open, unobstructed access for storing and retrieving large instruments. Carts with spines provide high-density storage. All carts feature impact-resistant plastic that will not chip, dent, or rust and carry a 10-year warranty.

Stainless Steel Case Carts

Minor Case Cart

Space-Saving Cart

Multi-Case Drawer Cart

Major Case Cart

Multi-Case Cart, Back Table

Stainless steel case carts are key components in a systematic, laborsaving approach to organizing and moving supplies, whether across the hall or over the road. Cart drawers are fully interchangeable with other Herman Miller storage and transport products, so supplies move seamlessly from central sterile to operating room. Individual

cases can be placed in their own drawers or all drawers can be dedicated to a single procedure; either approach results in better organization and increased efficiency. Within carts, shelves and drawers can be placed at multiple locations for maximum flexibility. Cart cabinets are covered by a 5-year warranty.

Custom Configurations

Step-by-Step Product Customizing

Some work processes are best met with products configured to meet those specific needs. Herman Miller allows this flexibility, with the result that these custom-built products make work faster and easier to perform.

This section provides everything you need to build products that match your specific requirements. Information is presented in a format that walks you through the simple steps of specifying your own customized products.

You have your choice of multiple sizes, shapes and types of foundation elements, durable interchangeable components and laborsaving accessories. Best of all, the adaptable design of Herman Miller healthcare products allows them to accommodate your needs when they change.

Procedure/Supply Cart Features and Benefits

Procedure/supply carts can be configured to meet specific needs now and quickly changed to handle new requirements. This flexibility is achieved through a wide selection of cart sizes and an extensive assortment of interchangeable components, including durable plastic drawers that can be used in other Herman Miller healthcare storage and transport products.

Available in either single-wide or double-wide versions and three heights, procedure/supply carts are designed to meet the changing demands of today's healthcare facilities.

- Cart bodies are made of impact-resistant plastic that will not fade, chip, dent or rust
- Accessories are easily reconfigured without tools to meet changes in work processes or packaging of supplies
- A wide assortment of accessories help any task get accomplished faster and easier and interface with other Herman Miller healthcare products
- Accessories do not require holes in cart side walls that may compromise cleanliness
- 10-year warranty reduces maintenance costs
- Smooth edges and rounded corners make carts easy to clean

Cart Segments

Sides of carts are divided into segments starting with 1 at the bottom and going up. The 36"H cart has 4 segments, the 42"H and 72"H carts have 5 usable segments. Check individual accessory dimensions to ensure enough vertical clearance and rail space (width) to avoid interference between accessories.

The cord wrap and utility hook occupy partial segments.

Stainless Steel Case Cart Features and Benefits

Our stainless steel case carts are an important part of an overall, laborsaving delivery system. They feature durable, easy-to-clean drawers that interchange with our other storage and transport products so that supplies can be packed once and not handled again until point of use. Drawers and shelves can be located anywhere inside carts and easily relocated when necessary.

A superior 5-year warranty on the cart body and these features set our stainless steel carts apart.

- Rugged design permits carts to travel over the road from site to site
- Shock-absorbent plastic drawers organize and protect supplies, clean easily and enable users to create case drawers
- Perforated shelves protect sterile packages from damage, yet dry quickly when washed
- Security bracket accepts tamper-evident seal to secure contents during transport
- Cart floors are sloped and have drain holes to promote water drainage and fast drying
- Field-replaceable parts minimize downtime and reduce maintenance costs

Wire Cart/Shelving Unit Features and Benefits

Herman Miller healthcare wire products are an integral part of an overall materials management system. The line features shelving and carts in a variety of sizes, from simple utility to sophisticated supply delivery, from suture to security. Units accept a range of accessories, including tote boxes and dividers for convenient organization of small items. Also included is a high-density storage system with an overhead track that makes the most productive use of available floor space.

These features make our wire products particularly suited to the demands of large-capacity storage and the transport of supplies and equipment.

- Incorporates more trusses and larger diameter wires than industry standard, so shelves resist deflection even under heavy loads
- Add-a-shelf can be securely attached without disassembling the unit, which permits faster, easier changes
- Wide variety of accessories allow the user to maximize storage space
- 5-year warranty is the best in the industry
- Unique seismic shelving does not require additional bracing

High-Density Storage Systems

High-Density Storage System

This system provides maximum storage in a minimum amount of space. It assembles easily and quickly. The clear access it provides to all units makes cleaning easy, preventing floor dirt and debris from accumulating. Overall height is 74 $\frac{1}{4}$ ".

Step 1: Select Overhead Track Kit

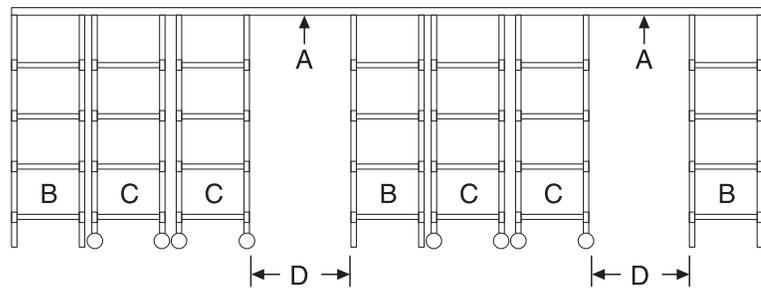

Overhead Track Kit

Determine overall width of run to be created including aisle space (30"W to 36"W aisles recommended; if storing larger items, greater than 36"W aisle recommended). Track system should be installed 6" from the wall. Includes front and back sections of track and hardware for assembling widths of 6' to 21'. Kits 9' or wider are shipped in 2 or more sections with joiner pieces and all hardware.

High-Density Storage Systems

Step 2: Select Stationary End/Intermediate Unit Kits

Stationary End/Intermediate Unit Kit

Provides stabilizing unit for end of run. Order 1 kit per end. Stationary end units must be secured to the floor either by using bolts through the foot plate or using a two-part adhesive. For runs wider than 30', 1 additional unit is required at midspan. Includes all 74"H posts and hardware necessary for connecting unit to track. Chrome finish. Minimum of 4 wire or solid shelves per kit required, order separately.

	Number	Price
	CWEP74C	\$76

Step 3: Select Mobile Unit Kits

Mobile Unit Kit

Includes all posts, hardware, and casters for each mobile kit. Post with caster is 74"H. Chrome finish. Minimum of 4 wire or solid shelves per kit recommended, order separately.

Step 4: Select Shelves

Shelf depth for end and intermediate units must be equal to or deeper than mobile units. Maximum recommended shelf width is 60". Maximum recommended shelf width for storing heavy materials such as solutions is 48". See pages 41 and 43 for wire and solid shelf selections.

Step 5: Select Accessories

See pages 48 to 53 for accessory selections.

Internal Component Planning

Procedure/supply carts have interior slots at 3" vertical increments for holding internal storage components. Use the drawings in this section to “design” the inside of your custom cart.

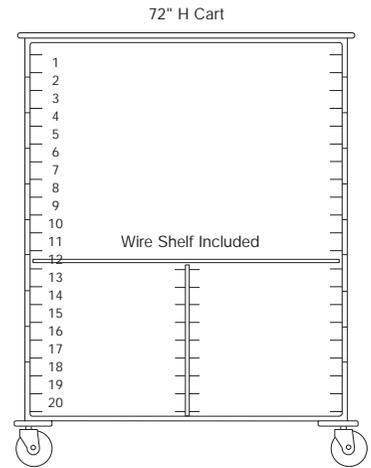

1. Begin by selecting a cart body.
2. Plan your internal storage components, keeping in mind that a 3"H drawer takes up 1 slot, a 6"H drawer 2 slots, and a 9"H drawer 3 slots. (9"H drawers are not available for 24"W procedure/supply carts.)
3. Allow adequate usable space above shelves, usually 2 or 3 slots.

Packaging

Packaging varies according to individual product. A surcharge may be added for special packaging requests. Contact Customer Care for specific information.

Keyed-Alike

All components with locks may be specified keyed alike. Products with keyed-alike locks will be shipped with lock plugs installed.

To order keyed-alike locks:

1. Choose keyed-alike product number.
2. Specify a key number if desired (00 through 99). If no key number is specified, one will be selected for you.
3. Specify the quantity of each kind of component to be keyed-alike.

Customers interested in ordering master keys should contact their local authorized dealer. A master key can be obtained with a written request to Herman Miller Customer Care. In addition, to remove lock plugs from existing components, loosen the hex nut inside the product and remove the plug.
